DETAILED ACTION

Allowable Subject Matter

1. Claims 2-9, 11-19 and 21-28 are allowable.
2. The following is a statement of reasons for the indication of

allowable subject matter:

Claims 2-9, 11-19 and 21-28 are allowable because the prior art, particularly Whitman [U.S. Patent No. 5,909,504], Volkov et al. [U.S. Patent No. 6,839,647] (hereafter Volkov), Giel et al. [U.S. Patent Application Publication No. 2002/0169734] (hereafter Giel), McGeer et al. [U.S. Patent No. 6,244,121] (hereafter McGeer) and Brayton et al. [U.S. Patent No. 6,823,280] (hereafter Brayton) fail to teach or suggest a computer-readable medium having computer-executable components, comprising:

a test method executor that is arranged to receive the request and invoke the requested test method by evaluating attributes that are associated with the requested test method before execution of the requested test method, to execute the requested test method, to evaluate attributes of the executed test method, to process data that is presented by the attributes that are associated with the requested test method, and to return a result to the test harness that signals the result of the evaluation of the executed test method attributes.

Whitman, Volkov, Giel, McGeer and Brayton also fail to teach or suggest a computer-readable medium having computer-executable components (or method), comprising:

a test method executor that is arranged to receive the request and invoke the requested test method by evaluating attributes that are associated with the requested test method before execution of the requested test method, to execute the requested test method, to evaluate attributes of the executed test method, to return a result to the test harness that signals a status that results when an exception is thrown, and to return a result to the test harness that signals the result of the evaluation of the executed test method attributes.
